Contents of Volume 55

Volume 55, Number 1, November 1, 1973

AUTHOR INDEX, Volume 55, Number 1 i

MUKUND J. MODAK, STUART L. MARCUS, and LIEBE F. CAVALIERI. DNA Complementary to Rabbit Globin mRNA Made by *E. coli* Polymerase I . . . 1

MARY L. STEPHENSON, JESSE F. SCOTT, and PAUL C. ZAMECNIK. Evidence That the Polyadenylic Acid Segment of "35s" RNA of Avian Myeloblastosis Virus Is Located at the 3′-OH Terminus. 8

GARY I. PORTNAY, FREDDIE D. McCLENDON, JO ELLEN BUSH, LEWIS E. BRAVERMAN, and BERNARD M. BABIOR. The Effect of Physiological Doses of Thyroxine on Carrier-Mediated ADP Uptake by Liver Mitochondria from Thyroidectomized Rats. 17

ADOLPH ABRAMS, ELIZABETH A. NOLAN, CHARLOTTE JENSEN, and JEFFREY B. SMITH. Tightly Bound Adenine Nucleotide in Bacterial Membrane ATPase 22

H. JANSEN, A. VAN ZUYLEN-VAN WIGGEN, and W. C. HÜLSMANN. Lipoprotein Lipase from Heart and Liver: An Immunological Study 30

LYNN D. FLEISHER, HARRIS H. TALLAN, NICHOLAS G. BERATIS, KURT HIRSCHHORN, and GERALD E. GAULL. Cystathionine Synthase Deficiency: Heterozygote Detection Using Cultured Skin Fibroblasts 38

BARBARA KAY GROVE and TERRY C. JOHNSON. The Effect of Ribonuclease on Ribosomal RNA and Subsequent Polypeptide Synthesis 45

TAKASHI KAWASAKI and YOSHIE KAYAMA. Effect of Lithium on Proline Transport by Whole Cells of *Escherichia coli* 52

R. GEIGER and R. OBERMEIER. Insulin Synthesis from Natural Chains by Means of Reversible Bridging Compounds. 60

R. M. CAPRIOLI, W. E. SEIFERT, Jr., and D. E. SUTHERLAND. Polypeptide Sequencing: Use of Dipeptidylaminopeptidase I and Gas Chromatography/Mass Spectrometry 67

GEORGE J. KLAIN and PHILIP C. WEISER. Changes in Hepatic Fatty Acid Synthesis following Glucagon Injections *in vivo*. 76

MIZUE MIYAMOTO, HIROSHI TERAYAMA, and TAKAYUKI OHNISHI. Effects of Protease Inhibitors on Liver Regeneration. 84

C. H. BARLOW, J. C. MAXWELL, W. J. WALLACE, and W. S. CAUGHEY. Elucidation of the Mode of Binding of Oxygen to Iron in Oxyhemoglobin by Infrared Spectroscopy. 91

BOLIVAR PEREYRA, MERCEDES A. PAZ, PAUL M. GALLOP, and OLGA O. BLUMENFELD. Systematic Identification of Aldehydes and Aldehyde-Derived Crosslinks in Elastin by Methods Including a Modified Strecker Reaction . . . 96

PETER DITTRICH, MARVIN L. SALIN, and CLANTON C. BLACK. Conversion of Carbon 4 of Malate into Products of the Pentose Cycle by Isolated Bundle Sheath Strands of *Digitaria sanguinalis* (L.) Scop. Leaves 104

JEFFREY A. SANDS. The Phospholipid Composition of Bacteriophage φ6 . . . 111

R. J. HARRIS, P. GREENWELL and R. H. SYMONS. Affinity Labelling of Ribosomal Peptidyl Transferase by a Puromycin Analogue 117

L. A. GRIVELL and V. METZ. Inhibition by Ethidium Bromide of Mitochondrial Protein Synthesis Programmed by Imported Poly(U). 125

J. P. CHAMBOST, A. FAVARD, and J. CATTANÉD. Unprimed Glucan Biosynthesis by a Particulate ADP-Glucose-Glucan Glucosyl Transferase from an *Escherichia coli* Mutant and Its Stimulation by a Protein Factor 132

HOWARD L. BACHRACH and WILLIAM R. HESS. Animal Picornaviruses with a Single Major Species of Capsid Protein 141

RICHARD HERMAN and NICOLE REBEYROTTE. Study of X-Irradiated DNA Using Formamide Gradients. 150

PIERRE DE MEYTS, JESSE ROTH, DAVID M. NEVILLE, JR., JAMES R. GAVIN, III, and MAXINE A. LESNIAK. Insulin Interactions with Its Receptors: Experimental Evidence for Negative Cooperativity. 154

DAVID A. HAWLEY and LAWRENCE I. SLOBIN. The Immunological Reactivity of 30S Ribosomal Proteins in 70S Ribosomes from *Escherichia coli*. 162

H. J. HARMON and F. L. CRANE. Topography of the Cristae Membrane as Elucidated by a New Inhibitor, Trifluorofurybutanedione. 169

EFRAIM RACKER and ESTHER EYTAN. Reconstitution of an Efficient Calcium Pump without Detergents. 174

A. KNAPP, M. J. KORNBLATT, H. SCHACHTER, and R. K. MURRAY. Studies on the Biosynthesis of Testicular Sulfoglycerogalactolipid: Demonstration of a Golgi-Associated Sulfotransferase Activity. 179

MING HUNG CHIANG and WAI YIU CHEUNG. Adenylate Cyclase of *Brevibacterium Liquefaciens:* Inactivation by Neuraminidase, Phospholipase A and Phospholipase C. 187

SIMON H. DE BRUIN, LAMBERT H. M. JANSSEN, and GERARD A. J. VAN OS The Interaction of 2,3—Diphosphoglycerate on Human Deoxy and Oxyhemoglobin. 193

D. MALCHOW and G. GERISCH. Cyclic AMP Binding to Living Cells of *Dictyostelium discoideum* in Presence of Excess Cyclic GMP. 200

C. S. TSAI. Temperature Dependent Transition of Lysozyme-β-Aryl Di-*N*-Acetylchitobioside Complex. 205

THOMAS I. KALMAN, ALEXANDER BLOCH, GABOR L. SZEKERES, and THOMAS J. BARDOS. Methylation of 4-Thio-2′-Deoxyuridylate by Thymidylate Synthetase. 210

THOMAS M. LOEHR and JOANN S. LOEHR. Determination of Oxidation and Spin States of Heme Iron. Resonance Raman Spectroscopy of Cytochrome *c*, Microperoxidase, and Horseradish Peroxidase. 218

EFRAIM RACKER. A New Procedure for the Reconstitution of Biologically Active Phospholipid Vesicles. 224

N. NARASIMBACHARI. Mass Spectra of the Reaction Products of Some Biologically Important Primary Amines and Fluorescamine. 231

JOHN H. RUSSELL and DAVID M. GELLER. Rat Serum Albumin Biosynthesis: Evidence for a Precursor. 239

PAUL M. ANDERSON, JEFFREY D. CARLSON, GERALD A. ROSENTHAL, and ALTON MEISTER. Effect on Potassium Cyanate on the Catalytic Activities of Carbamyl Phosphate Synthetase. 246

J. J. METZGER and P. PERY. Structural Features of the Porcine Immunoglobulin-G Interchain Disulfide Bridges. 253

Volume 55, Number 2, November 16, 1973

AUTHOR INDEX, VOLUME 55, Number 2 i

AUTHOR INDEXES, Volumes 50-55, 1973. 1393

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 × 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115,** 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote,** rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 × 8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
